Panama City, Fla. – The advisories have been rescinded for the Laguna Beach (SP 2) location at 19440 Front Beach Road, Panama City Beach, the Rick Seltzer Park (SP 6) location at 7419 Thomas Drive, Panama City Beach, the Spyglass Drive (SP 7) location at 4723 Spyglass Drive, Panama City Beach, and the Dupont Bridge (SP 11) location at 6601 Oak Shore Drive, Parker.

The Bay County Health Department, Bay CHD, conducts saltwater beach water quality monitoring in accordance with the Healthy Beaches Monitoring Program. Water samples are collected **twice a month between March and October**. The samples are checked for **enteric bacteria** that normally inhabit the intestinal tract of humans and animals. The presence of enteric bacteria **can be an indication of fecal pollution**, which may come from storm water runoff, pets and wildlife, and human sewage. **Poor** results are posted as an **“Advisory”** at the affected beaches.

Healthy Beaches advisories are issued **to protect swimmers from increased risk of gastrointestinal illnesses**. At a **lower occurring level**, there may also be increased risks of **upper respiratory infections, skin rashes, and ear infections**. Healthy Beach advisories are **not related to Necrotizing fasciitis**, a rare complication.

Sampling is usually done on **Mondays** with **results** on **Tuesday**, with exception of holidays. Results are shared at Bay.FloridaHealth.gov, through media releases, and **real-time** on the Florida Healthy Beaches page at FloridaHealth.gov and **search for “Healthy Beaches”**.

Florida Healthy Beaches Program Categories are; Good = 0-35 Enterococci per 100 milliliters of marine water, Moderate = 36-70 Enterococci per 100 milliliters of marine water, and **Poor = 71 or greater Enterococci per 100 milliliters of marine water**. If **levels are above 70**, **Bay CHD notifies** the local **Florida Department of Environmental Protection** for further investigation.

If you have any questions, please contact the Bay County Health Department at 850-481-4806 or visit the Department of Health's Internet Beach Water Quality website at <http://www.floridahealth.gov/healthy-environments/beach-water-quality/index.html>.
